Beattys

It's our business to power your progress

We are a family business, driven by providing excellent service and expertise to our customers within the transport, earthmoving and industrial sectors. We've been passionate about engineering and solutions since 1963 and are now recognised as a leading partner throughout New Zealand.

We partner with global suppliers that share our quality mindset to exceed customer expectations. So when it comes to hydraulic powered systems, products and machinery attachments, our aim is to provide an unbeatable level of service and range of expert solutions for the job.

TREVIBENNE

OUR GLOBAL PARTNER IN DEMOLITION,
RECYCLING, EARTHMOVING,
MINING, AND FORESTRY

Driven by
innovation,
passion & quality.

Ultimate hydraulic crushing power

Industry recognised as the fastest, most precise and powerful primary crusher available for operators looking to increase their productivity.

- ✓ Unmatched crushing power
- ✓ Ideal for primary demolition
- ✓ Large heavy-duty jaws
- ✓ Hardened bolt on teeth
- ✓ Fast cycle times with speed valves
- ✓ Continuous 360° rotation

The master of all tasks

Universal processors are a very versatile piece of kit. Equipped with a variety of different jaw attachments, they are perfect at matching the task at hand.

- ✓ Six different jaw sets
- ✓ Durable Hardox construction
- ✓ Dual oversized hydraulic cylinders
- ✓ Fast cycle times with speed valves
- ✓ Continuous 360° rotation

ROTATING PULVERIZERS

Powerful & productive

A unique design allows operators to deal with both the primary and secondary demolition tasks with a single piece of equipment.

- ✓ Large open jaw design for efficient work
- ✓ Durable Hardox construction
- ✓ Hard wearing bolt on teeth
- ✓ Fast cycle times with speed valves
- ✓ Continuous 360° rotation
- ✓ Sorting spikes for material selection

SECONDARY PULVERIZERS

The adaptable groundwork solution

Designed for high efficiency secondary demolition and concrete recycling, the secondary pulverizer offers unmatched power and large jaw capacities.

- ✓ Heavy duty, wide jaw
- ✓ Exceptional closing force
- ✓ Open jaw design for efficient work
- ✓ Durable Hardox construction
- ✓ Fast cycle times with speed valves
- ✓ Hardwearing bolt on teeth
- ✓ Serrated steel cutting blades

Your metal cutting shortcut

Designed for modern industrial demolition sites and professionals in the recycling industry. These shears are manufactured to out perform and out last.

- ✓ Extreme cutting force
- ✓ Durable Hardox construction
- ✓ Hardox HiTuf Jaw
- ✓ Superior protection of hydraulic cylinder
- ✓ Increased operator visibility
- ✓ Maximised cutting life
- ✓ Fast cycle times with speed valves
- ✓ Enclosed heavy duty rotation assembly

A stronger hold on your project

A versatile attachment ideal for handling a large range of materials and guaranteed to increase your excavator's productivity.

- ✓ Large carrying capacity
- ✓ Dual hydraulic cylinders
- ✓ Robust Hardox construction
- ✓ Heavy-duty, reinforced jaws
- ✓ Compact continuous 360° rotation

OUR PARTNERS IN PROVIDING
THE BEST AUTOMATIC QUICK
COUPLER SYSTEM IN THE WORLD

Always the
right attachment
for the job

Integrated hydraulic performance

OilQuick is one of the most advanced automatic quick coupler systems – for excavators between 1 and 120 tonnes – that can rapidly switch between different types of hydraulic attachments directly from the cab.

- ✓ Switch hydraulic attachments in seconds
- ✓ Protected hose routing on machine and attachments
- ✓ Eliminates oil leaks
- ✓ Squat profile maximises breakout force
- ✓ Increased safety
- ✓ Increased productivity
- ✓ Increased profitability

The flexible hydraulic multi-tasker

The OilQuick Tiltrotator is a hydraulic joint that turns an excavator into a flexible and capable multi-tasker.

By integrating the automatic quick coupler technology, it can not only rotate and tilt but also rapidly couple the right hydraulic attachment for the job.

- ✓ Quick and easy attachment
- ✓ Maximum digging capacity and breakout force
- ✓ Minimise excavator movements
- ✓ Increased flexibility
- ✓ Increased efficiency
- ✓ Continuous 360° rotation

THE LEADING SPECIALISTS
OF MOBILE HYDRAULICS

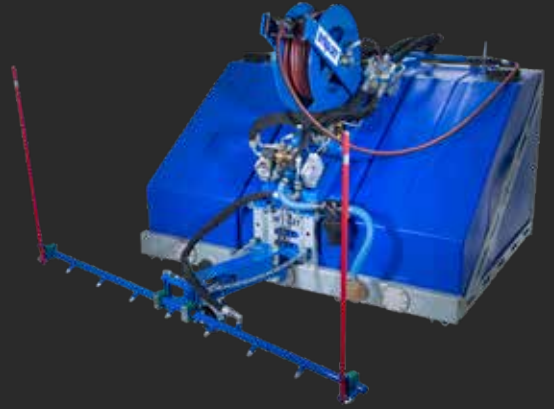

Your go-to for
all things hydraulic
powered

For an all-in-one deep clean

Dynaset's light weight all-in-one Street Washer effectively deep cleans surfaces with its range of attachments that can tackle dirt at virtually any angle.

- ✓ Deep cleans surfaces
- ✓ High-pressure washing head
- ✓ Eliminates dust when cleaning
- ✓ Low water consumption
- ✓ Attach to mobile machinery
- ✓ Moving washing head
- ✓ Intergrated washing gun
- ✓ Plug & play system

Mobile magnet power

The hydraulic-driven lifting magnets are an ideal attachment for demolition and recycling contractors turning their scrap metal into profit.

- ✓ High tear-off force
- ✓ World's fastest demagnetising time
- ✓ Uses auxiliary hydraulics
- ✓ Quick to switch between machines
- ✓ Integrated hydraulic control valves

ELECTRO MAGNETS

Turning scrap into profit

Tackle your recycling and steel manufacturing projects with our electro magnets. The ultimate attachment for material handlers and excavators.

- ✓ Large lifting capacities
- ✓ Rugged durable casing
- ✓ Heavy duty coil
- ✓ Protective heat insulation gasket
- ✓ Hardwearing protective base plate

HIGH PRESSURE DUST SUPPRESSION

Targeted dust control

Effective dust control during demolition or construction is critical keeping public spaces safe and dust free. The SmartFlow system produces high pressure water through its uniquely designed nozzles that create an atomised mist which removes even the smallest specs of dust.

- ✓ Targeted water mist
- ✓ Microscopic water droplets
- ✓ Low water consumption
- ✓ No water build up
- ✓ Increased visibility
- ✓ Heavy duty nozzles holders
- ✓ Reduced labour costs
- ✓ Cabin joystick operated
- ✓ Install on any hydraulic system

DUST CANNONS

Heavy duty dust control

Specifically designed to spray a mist to effectively combat dust, odour and air pollution. These cannons can be mounted as permanent or mobile installations for quick and efficient misting in any application.

- ✓ Effectively manage large areas of dust
- ✓ Centred nozzle bank
- ✓ Low water consumption
- ✓ Effective spraying pattern
- ✓ Robust construction
- ✓ Electric oscillation & tilt
